

28 January 2022

ReNeuron Group plc
("ReNeuron" or the "Company")

Investor Presentation

ReNeuron Group plc (AIM: RENE), a UK-based leader in Stem Cell based Exosome Technologies, announces that it will provide a live presentation and Q&A for investors on Friday 4 February 2022 at 12.00pm (GMT).

CEO, Olav Hellebø and CFO, Catherine Isted will cover the recent strategic update and there will be an opportunity to ask questions.

The presentation will be hosted through the digital platform Investor Meet Company. Investors can sign up to Investor Meet Company for free and request to meet ReNeuron Group plc via the following link: <https://www.investormeetcompany.com/reneuron-group-plc/register-investor>

Questions can be submitted pre-event via your IMC dashboard or in real time during the presentation, via the "Ask a Question" function. Whilst the Company may not be in a position to answer every question it receives, it will address the most prominent within the confines of regulations and information already disclosed to the market through regulatory notifications. A recording of the presentation, a PDF of the slides used, and responses to the Q&A session will be available on the Investor Meet Company platform afterwards. No new price sensitive information will be disclosed, and a PDF of the presentation will be uploaded to the Company's website.

About ReNeuron

ReNeuron is a UK based Proprietary Stem Cell based Exosome Technologies company, harnessing its unique stem cell technologies to develop 'off the shelf' treatments for disease with significant unmet needs.

ReNeuron's stem cell derived proprietary Exosome Technology platform offers a delivery mechanism for a variety of payloads such as siRNA, mRNA, proteins, small molecules and genes. The Company has a growing number of partner collaborations with Global Pharma, Biotech and academic partners in this fast-expanding area of scientific and commercial interest. ReNeuron also has the ability through its conditionally immortalised induced pluripotent stem cell (iPSC) platform to make allogeneic tissue cells of choice and has the potential to produce exosomes with tissue specific targeting ability.

The Company also has a Phase 2 cell therapy candidate in retinitis pigmentosa which it plans to out-license and also has out-licensed its CTX programme in stroke disability to Fosun in China.

ReNeuron's shares are traded on the London AIM market under the symbol RENE.L. For further information visit www.reneuron.com
