About ReNeuron

ReNeuron is a UK based Proprietary Stem Cell based Exosome Technologies company, harnessing its unique stem cell technologies to develop 'off the shelf' treatments for diseases with significant unmet needs.

ReNeuron's stem cell derived proprietary Exosome Technology platform offers a delivery mechanism for a variety of payloads such as siRNA, mRNA, proteins, small molecules and genes. The Company has a growing number of partner collaborations with Global Pharma, Biotech and academic partners in this fast-expanding area of scientific and commercial interest. ReNeuron also has the ability, through its conditionally immortalised induced pluripotent stem cell (iPSC) platform, to make allogeneic tissue cells of choice and has the potential to produce exosomes with tissue specific targeting ability.

The Company has out-licenced its CTX Programme for stroke disability and hRPC programme in retinitis pigmentosa to Fosun in China and is looking to out-licence both these programmes in other territories.

ReNeuron's shares are traded on the London AIM market under the symbol RENE.L. For further information visit www.reneuron.com
